2026 AUTUMN & WINTER

Shared Success

Welcome to the 2026 Autumn & Winter edition of Durapro Magazine.

On our cover are the young athletes of the Puli Junior High School Basketball Team. Coming from rural indigenous communities, their success on the national stage is built purely on discipline and heart. Their victories belong to them. Yet behind every triumph, quiet support matters. Since 2021, Durapro has quietly supported their path — renewing their living and training spaces so they can focus on what matters most: the game.

This reflects our view of true partnership: being the quiet foundation that enables others to excel, and celebrating every milestone together.

It is the same principle that guides our business. Growing a brand takes vision and unwavering focus. We quietly take care of the complexities behind it, giving you the peace of mind to pursue what lies ahead. Inside this issue, you will find our updated platform, curated core lines, and solutions shaped around your workflow.

Every achievement is a journey worth sharing. We are honored to stand with you and celebrate the success we build together.

Where Ideas Take Shape -

Updated Platform, Core Lines, and Partnership

A Refined Interface: Designed for Inspiration

We have updated our official website with a clean, focused design. Consider it a canvas for inspiration. We invite you to explore these foundation concepts — developed to spark ideas, invite custom adaptations, and serve as the starting point for your tailored market solutions.

Three Defined Lines: The Durapro Portfolio

To simplify your navigation, our product lineup is organized into three distinct color codes — each representing a core pillar of our craftsmanship:

- The Blackline — Professional Hand Tools
- The Redline — Automotive Electronics
- The Silverline — Workshop Essentials

How We Bring Your Ideas to Life: The Partnership Journey

Partnering with Durapro is built on transparency, direct communication, and genuine care. We turn your initial ideas into market-ready products through four clear steps:

01 / Explore

"Every breakthrough begins with a single spark of curiosity."

Browse our concept designs on the platform to find inspiration and start defining your project.

02 / Co-Create

"Great products are born from meaningful dialogue."

Our team works directly with you, tailoring every detail to match your exact requirements.

03 / Quality Assurance

"Consistent standards, from the first sample to final production."

We combine early sample verification with strict production QC – ensuring true precision every step of the way.

04 / Delivery

"Reliability, right up to your warehouse door."

Working with trusted logistics partners, we offer flexible terms and clear, personal updates right through final delivery

Crafting the Future Together

Great design is never created in isolation; it is born from shared values and meaningful dialogue. Your next breakthrough doesn't need to start with a complex blueprint; it only requires a single spark of curiosity. Allow us to help you write your next chapter. Our specialists are ready to listen, collaborate, and craft your ideas into reality.

Durapro Studio

A Brighter Sight for a Safer Night

Visibility That Protects Every Journey

When night falls, visibility matters more than speed for driving safety.

Through advanced lighting and reflector technology, Durapro delivers reliable performance in even the harshest conditions.

Designed to maximize recognition, enhance visibility, and minimize risk, every beam helps transform dark highways into safer journeys, giving drivers greater confidence when every second counts.

Synchronization Safety Light Series

Designed for active protection, this light set features 16 high-intensity LEDs, 9 flashing modes, and 360-degree visibility.

Its heavy-duty magnetic backing enables quick installation, providing enhanced safety whenever needed.

Warning Triangle

Upgraded Warning Triangle features an expanded fluorescent layer that enhances passive safety – reflecting distant headlights and maximizing visibility when every second counts.

Durapro Selections

The Blackline

- Reliable Performance, Greater Efficiency

**Dura - 1561****All-round**

- Driver size: 1"
- RPM: 4,500
- Air inlet: 1/2"
- Extension anvil:
AN: 9" / BN: 6" / CN: 2"
- Working torque:
2,034 / 2,305 / 2,576 Nm

Dura - 4760**Heavy duty**

- Driver size:
AN: 1/2" / BN 3/4"
- RPM: 7,000
- Air inlet: 1/4"
- Bursting torque:
2,238 / 2,373 Nm

**Dura - 3960****Agile**

- Driver size:
AN: 1/2" / BN 3/4"
- RPM: 7,000
- Air inlet: 1/4"
- Bursting torque:
1,966 / 2,170 Nm

Triple Hammer Impact Wrench

Triple Hammer - Clutch Upgrade from Twin Hammer

Twin Hammer has set the standard for powerful and reliable impact performance. Now, Triple Hammer takes it one step further.

By refining the impact mechanism and optimizing power transmission, Triple Hammer delivers a more balanced, durable, and efficient solution for applications.

Let's see from every aspect:

- **Low Vibration:**

Unlike the swinging impact of a twin hammer mechanism, the triple hammer moves in parallel; resulting in smoother torque output, less user fatigue and reducing the risk of injuries caused by high vibration.

- **Improved Durability:**

Feedback from users indicates that the unique design of the triple hammer mechanism has increased tool life by 50% compared to the twin hammer mechanism. The wear of individual components is reduced, resulting in fewer maintenance issues and lower overall costs.

- **Maintain Effectiveness Even Under Low Pressure Conditions**

The design of triple hammer mechanism leads to efficient energy transfer from the air source to the impacting mechanism. The release structure can prevent overheating and jamming during a long-term use.

- **Versatility for Many Industrial Application:**

The full-range of triple hammer impact wrench is suitable for a wide application, including automotive repair, racing car exercise, construction, and industrial maintenance. They handle various fastening tasks with ease, from driving screws to loosening stubborn nuts and bolts.

Magnetic Adapter

For more flexible tool applications – we present magnetic adapters.

It provides an impact wrench to accommodate sockets with different drive sizes.

The adapters feature a portable and lightweight design, secure magnetic retention, fast tool changes, and easy accessibility. And the biggest advantage is the magnetic design, which helps keep the adapter and socket securely in position during operation. The strong magnetic connection ensures reliable performance, while the quick-release mechanism and compact form factor make operation effortless even in limited spaces.

Available for single and also a complete set with EVA foam, paired with a range of sockets for more versatile applications !

Impact Adapter Set (Magnetic Adapter included)

- 1/4"(F) x 3/8"(M) • 3/8"(F) x 1/2"(M) • 1/2"(F) x 3/4"(M) • 3/4"(F) x 1"(M)
- 1/2"(F) x 3/8"(M) • 3/8"(F) x 1/2"(M) • 3/8"(F) x 1/4"(M) • 1/4"(F) x 3/8"(M)
- 1/2"(F) x 3/4"(M) • 3/4"(F) x 1/2"(M) • 3/4"(F) x 1"(M) • 1"(F) x 3/4"(M)

Against the Odds:

The Rise of Puli Junior High

School Basketball Team

About the Team

For nearly 15 years, the Puli Junior High School Basketball Team has embodied resilience and determination. Most players come from rural indigenous communities, where financial hardship and limited resources are part of daily life.

Guided by the values of Discipline, Commitment, and Perseverance, and led by Coaches Wei-kuang Shih and Min-che Yu, the team has built a strong foundation through consistent training and competition. Their speed, teamwork, and fundamentally sound basketball have become their hallmark.

Most players live on campus alongside their coaches, who provide daily guidance and care beyond the court. Supported by the school and encouraged by devoted families, these young athletes are given the opportunity to pursue both academic and athletic excellence.

Never Give Up

When we met Coach Yu in late 2021, we learned of the team's many challenges — from limited funding and basic facilities to container-house dormitories. Yet what impressed us most was the unwavering dedication of the coaches and school, who were committed not only to developing athletes, but also to shaping confident, responsible young people. And so, we did not hesitate to step in and help.

With the continued support of generous donors and the county government, the team's dormitory and training facilities were renewed in 2024.

Inspired by this support, the players turned adversity into motivation. Through hard work, discipline, and teamwork, they have achieved remarkable success year after year.

Our journey with sponsored teams goes beyond support. Through shared passion, challenges, and achievements, Durapro and our partners continue to inspire, grow, and move forward together.
